Rule 2.6 Definition of a Non-Complex Appraisal.

A non-complex appraisal is one having the following characteristics;

1. there is an active market of essentially identical properties;
2. adequate data is available to the appraiser
3. adjustments to comparable sales are not large in the aggregate, specifically not exceeding the trading range found in the market of essentially identical properties; and
4. For residential property, the contract price falls within the market norm (Median sales price) of homes in the neighborhood.

Examples of a non-complex residential appraisal (12 hours) are those similar to Fannie Mae form 1004/Freddie Mac form 70, not including the income approach; (8 hours) Fannie Mae forms 2055 and 2075; (4 hours) vacant land or site appraisals using only the sales comparison approach or a narrative report. In all cases compliance with the Uniform Standards of Professional Appraisal Practice (USPAP) is required.

Examples: non-complex non-residential appraisal (16 hours) would not include all three (3) of the approaches to value when all three (3) approaches would be applicable for the classification of the property appraised or market data was available for all three (3) approaches.

All hours for appraisals are subject to final determination and approval by the Appraisal Board.

2. There is not adequate data available to the appraiser.
3. Adjustments to comparable sales are large and the aggregate adjustments exceed the trading range of sales identified
4. For residential property, the contract price does not fall within the market norm of houses in the market area.

No appraisal experience credit will be allowed for a complex appraisal unless all three (3) approaches to value are fully developed in the report.

Examples: a complex non-residential appraisal (66 hours) may contain any of the following: income capitalization approach; income expense analysis; building – land residual technique; leased fee – lease hold interest; absorption rate; discounting to present value; highest and best use is not the current use; itemized accrued depreciation; unit-in-place method or quantity survey method in the cost approach; site or vacant land using the allocation method, abstraction method, subdivision development method, or land residual method; appraisal requires the appraiser's use of data obtained from a professional who is not an appraiser; a use of property that has no comparable sales with the same use; a property covered by the Environmental Protection Agency; a conservation easement; an appraisal that requires the before and after values. Other valuations may qualify as determined by the Appraisal Board.
